

FEMA Flood Study Municipal Index 9/11/2015

Column Definitions

Revised Flood Zone Delineations: FEMA flood zones are being revised for flood zone delineations and base flood elevations.

Updated FIRM Panels: The community will receive Flood Insurance Rate Map panels that have been brought into FEMA's new format specifications. This will be inclusive of all revised and unrevised flood zone delineations.

Updated Floodplains: Updated engineering studies were performed for floodplain sources modeled and mapped as Zone A or Zone AE. Floodplains on these streams may also affect backwater for tributaries near confluences. Note that updated floodplains may be associated with a flooding source located in a neighboring community.
